

The Corporation Of The Township of Stone Mills Civic Addressing Program

Program Steps

1. Identification of a small number of roads and civic addresses that have been deemed as being a high priority
2. Obtain approval for a list of specific road names through the County contact which will include any names previously suggested by residents along any given road
3. Assignment of a road name in those instances from those approved road names where no previous civic address has been assigned, or where the existing civic addressing has not been assigned to existing current standards
4. The confirmation and recording of all addresses as they presently exist
5. The assignment of a specific civic address number to each existing address in accordance with approved civic addressing techniques
6. Notification of residents and business owners of the assignment of their new civic address together with an effective date following which they will be required to notify government and service providers of the new civic address
7. Placement of road name signs and civic address numbers on the selected roads with covers not to be removed until the effective date of the new civic addresses
8. Notification of emergency service providers, Canada Post Corporation and Bell Canada with old and new civic addresses
9. Upon the effective date, all covers of road name signs and civic address numbers will be removed
10. Following this initial program of changes, a new group of roads and civic addresses will be identified and the program will be repeated until such time as there is a continuity of civic addressing across the Township.
